### Step 1

1

Base is just one part. (Printed face should be up). Nothing much to do here except fold the flaps.

Step 2

2

Fold and glue part 2 by matching the edge numbers.

Keep in mind that printed faces should be oriented to be inside the model.
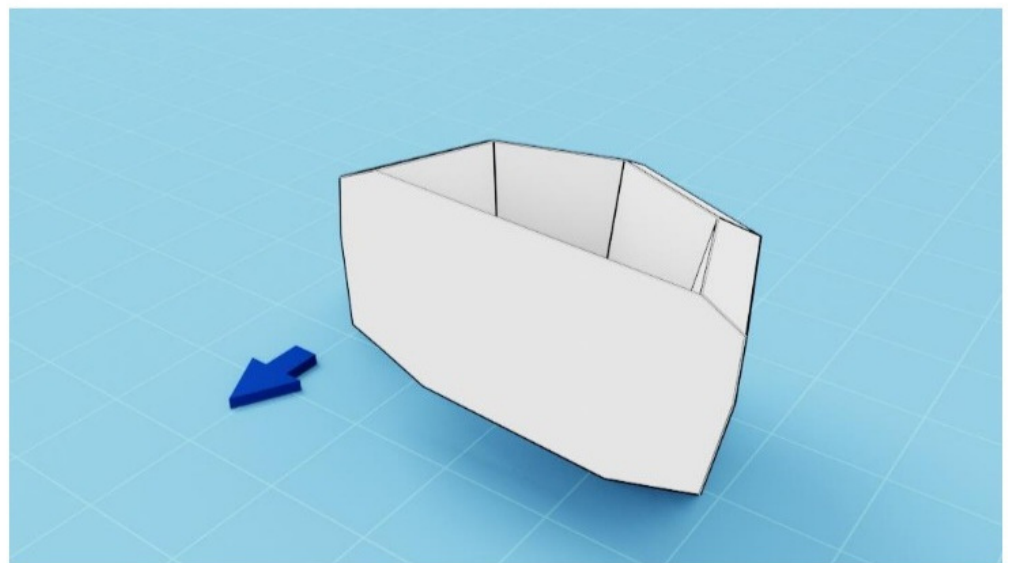

## Step 3

3

Now add the inner of the "pocket".

Step 4

4

Glue this part over the whole back side of the sock.

Step 5

5

Now add part 5 which is the other part of the backplate.

Step 6

Place what you made so far onto the cardboard, draw the lines around it and cut the cardboard in the same shape.

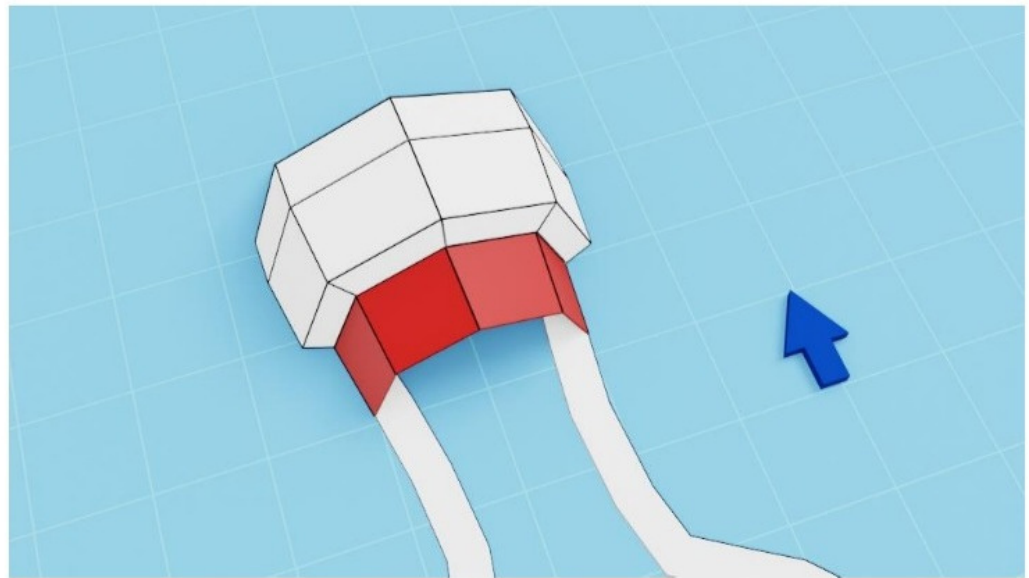

Step 7

Finally, glue it to cardboard.

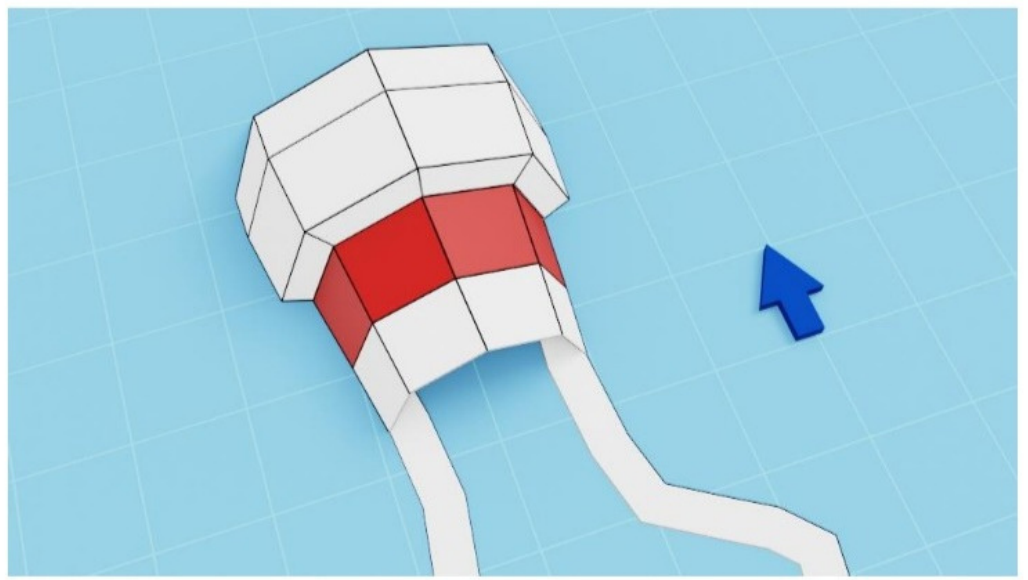

Step 8

6

Start adding parts one by one. Keep doing this for the rest of the section.

Step 13

11
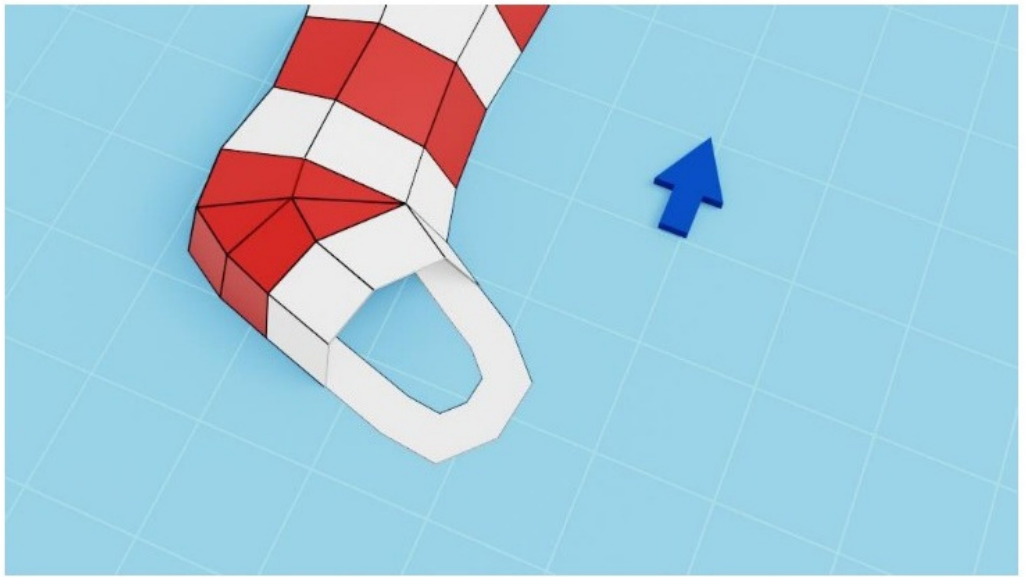

Step 14
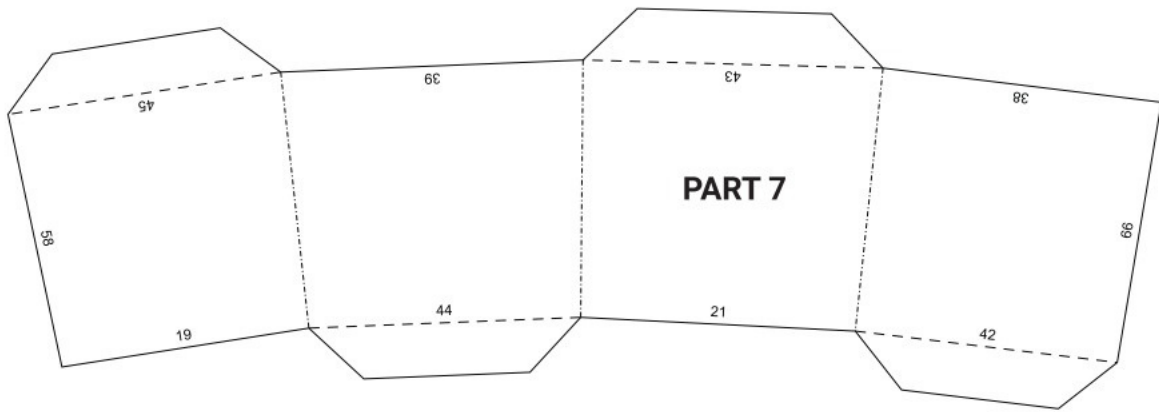

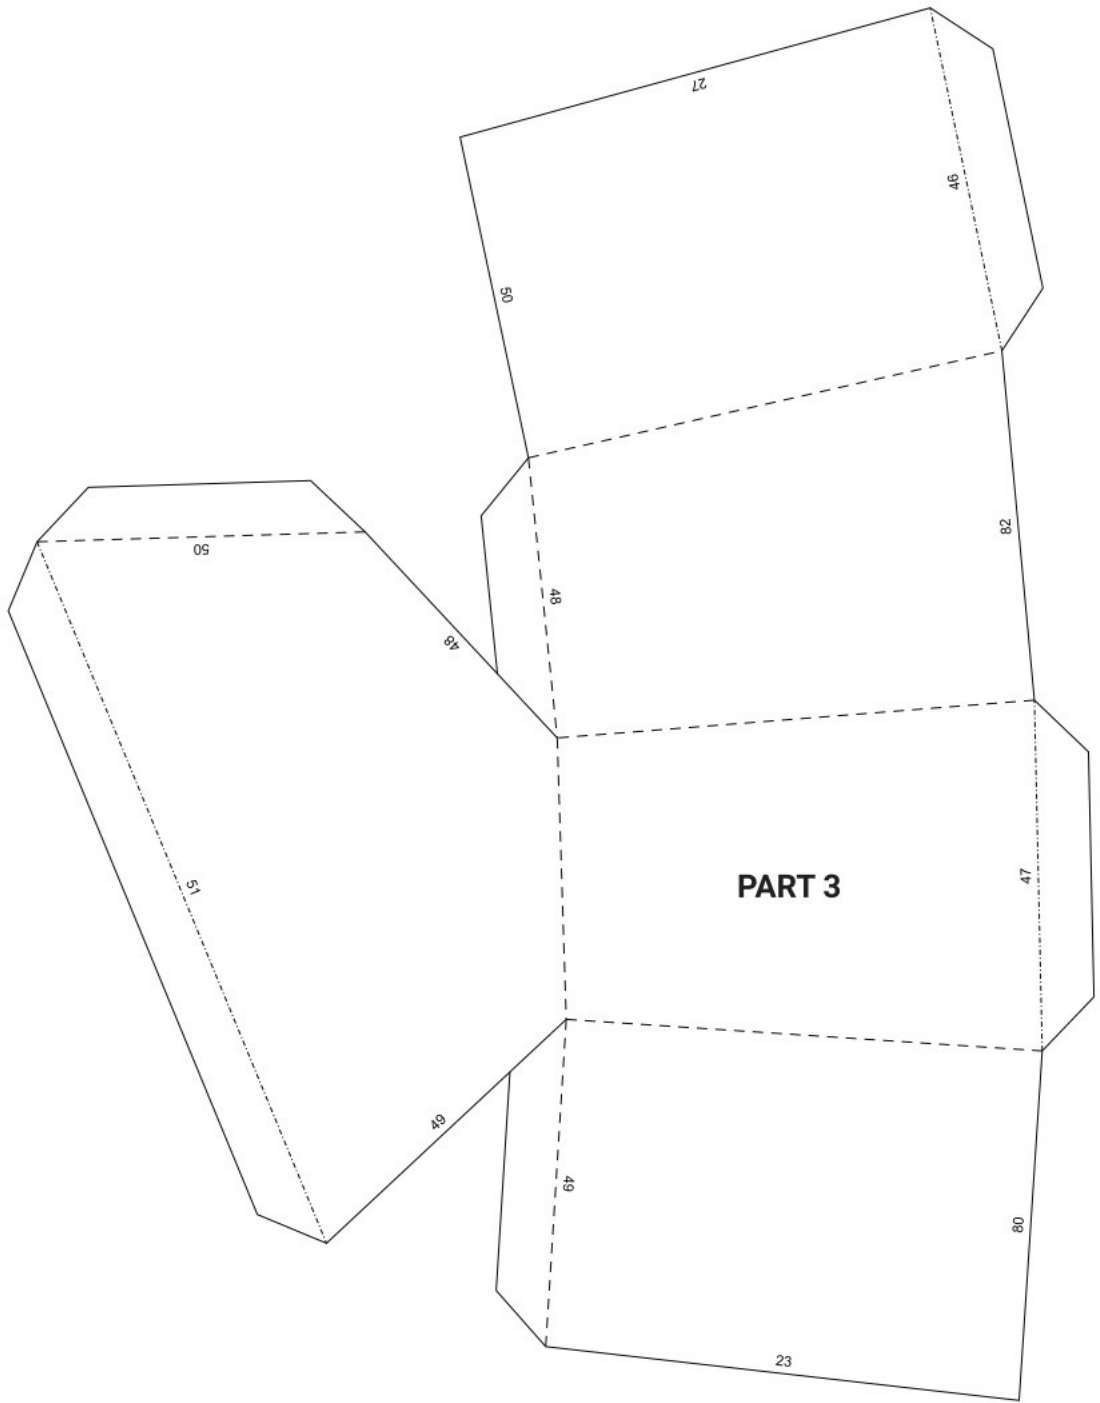

12

Step 15
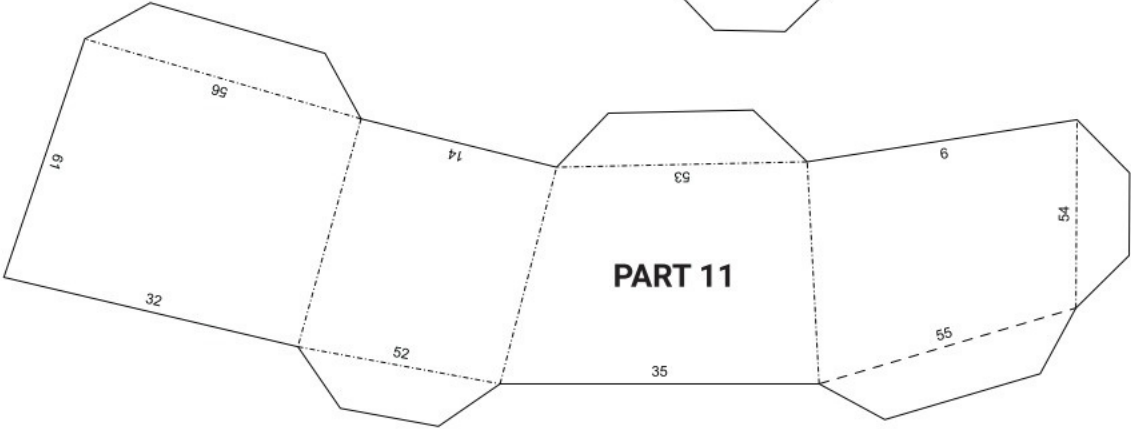

That's it! You are done! Congratulations.

Next steps:

You could make a hole at the back side of the "pocket" so you can hang the sock on a nail, or with a piece of rope or something similar.
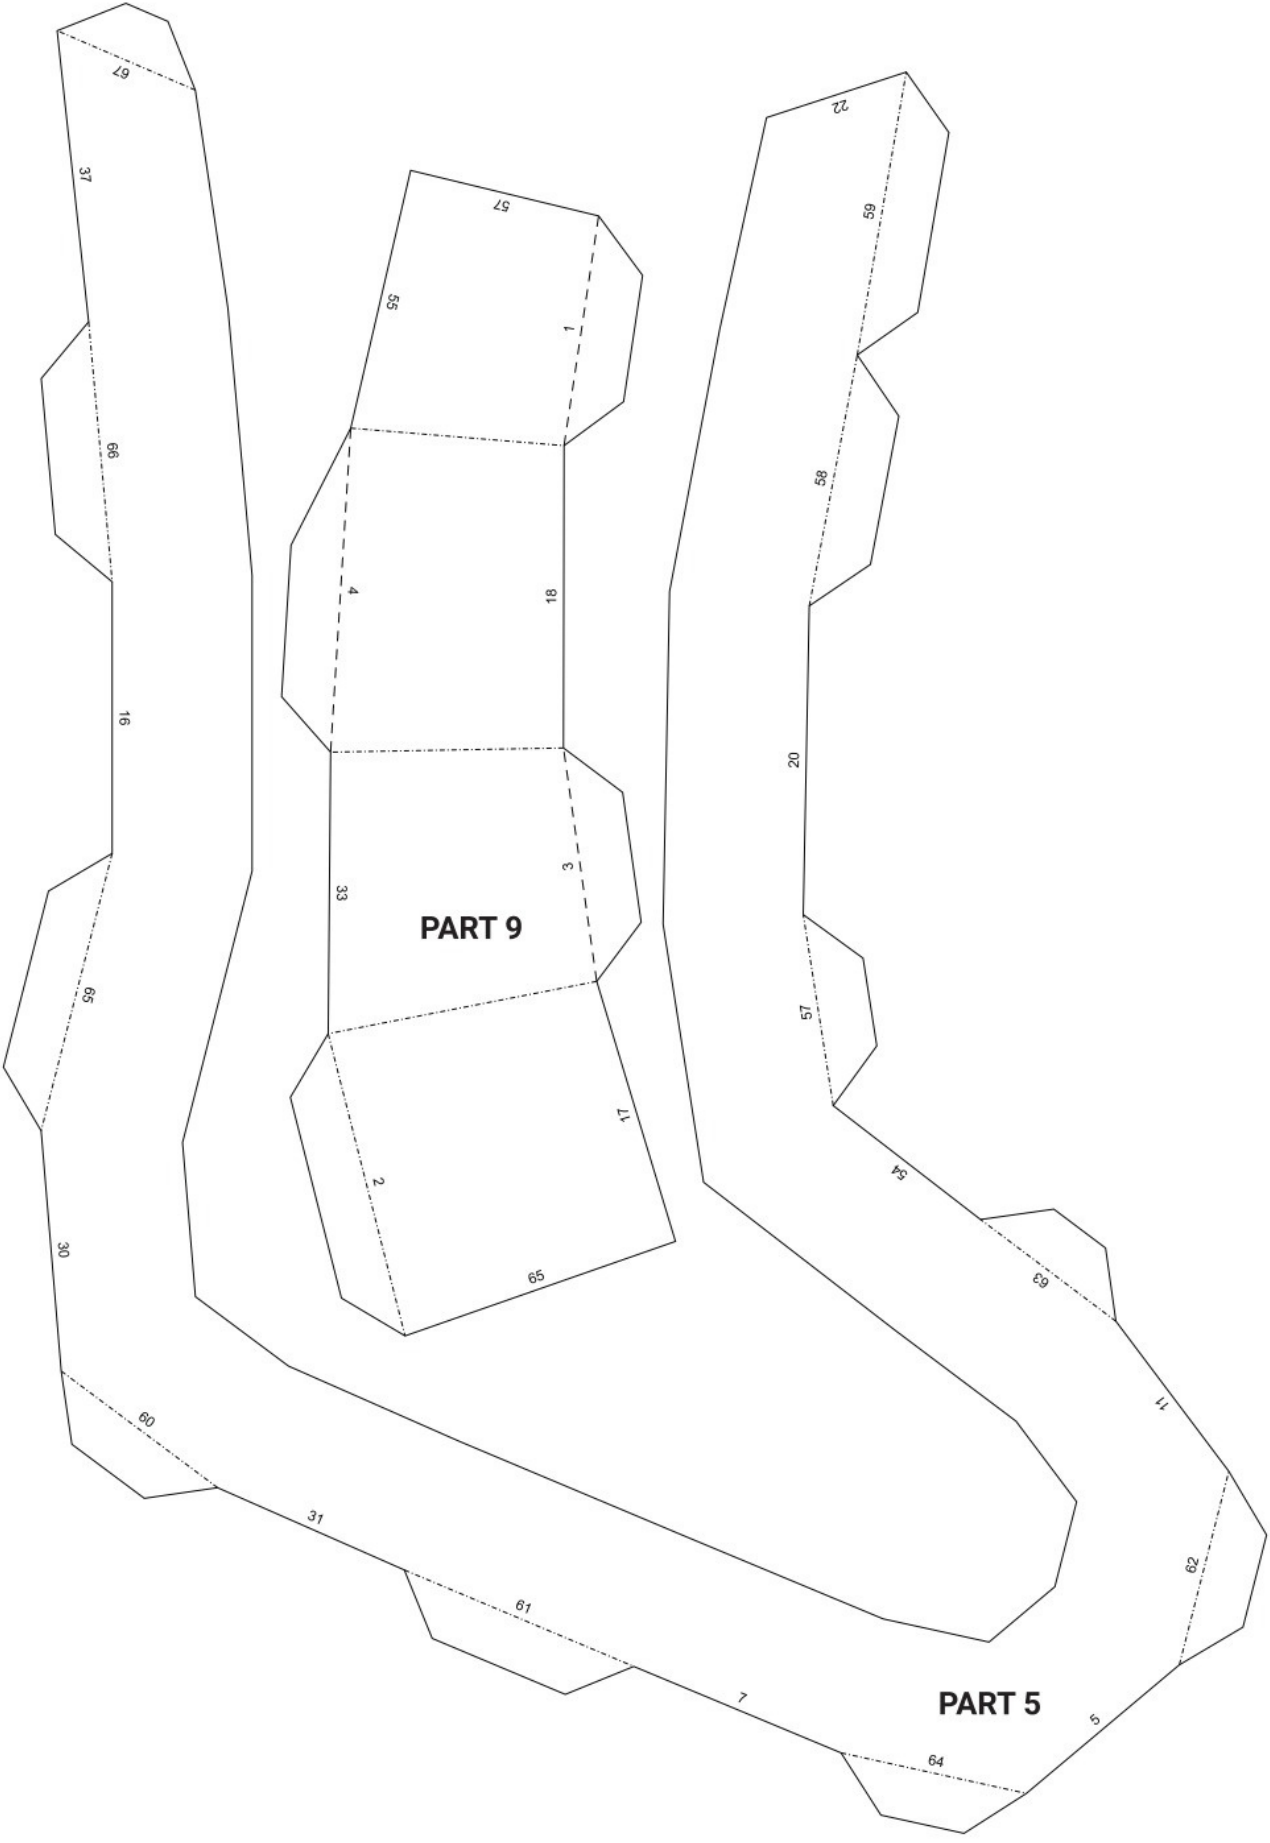

Fill it with candy! :)
